

1. go to the myMapServer login page <http://my.meteoblue.com/my/>
2. scroll down until you see JAVA plugin. TEST IT here! (below the graphs)
3. click on TEST IT here!
4. What does the pop-up say?
  - a. "JAVA is enabled" : you are ready to use mymeteoblue myMapServer!
  - b. not running !! : you will have to install the JAVA plugin, which is part of the JAVA JRE/JVM. Please follow the instructions given below.
5. Java Plug-in is available free of charge from Sun Microsystems. It is a part of the Sun Java Virtual Machine (JVM) software package. You will need to download the Sun Java Virtual Machine (JVM) to get Java Plug-in. Most browsers have older versions of Java technology already built-in. However, these older versions of Java will not run applets, the Java platform's most advanced features. By installing and using Sun's Java Plug-in, you know that you have the latest Java technology available.
6. Click below on the link to Sun's download and install Web page and follow the instructions. you should get the page
  - a. <http://java.com/de/download/index.jsp> (German browser) and the question "Habe ich Java bereits?"
  - b. <http://java.com/de/download/index.jsp> (German browser) and the question "Habe ich Java bereits?"
  - c. Other countries may have different versions.
7. Download and Install the Sun Java Virtual Machine (JVM). The installation should be completed in 3-10 minutes, depending on connection speed. Some tips:
  - a. do it with nothing else open. That makes sure that every prompt you get is answered by you.
  - b. Make notes if you get prompts.
  - c. If you are using MS Windows, shut down Windows after installation and leave computer switched off for 20 seconds before restarting.
  - d. Boot normally, without speeding up. Make notes of unusual prompts you may get.
8. Restart your computer.
9. If your JAVA didn't install correctly, best is to do it again or contact java.com to find out why it didn't work. Some infrequent problem reports.
  - a. Internet explorer settings. Security settings don't allow installation.
  - b. Old browser versions.
